Skills

JavaScript/TypeScript (ES6+), Angular, React, Node, GraphQL, C#, SQL, CSS/SASS, HTML, Express, Git

Experience

JULY 2019 - JULY 2020

Power Kiosk – Junior Software Developer

- Converted legacy Coldfusion code to a modern stack of **Angular**, **Node**, and **GraphQL**, increasing development efficiency and the speed of the platform.
- Developed a **brand new platform** (<https://octipower.com>) alongside one senior developer, offering customers more flexibility and autonomy in choosing their energy plan.
- **Independently** developed an **OCR** project in **C#** utilizing **Google's Vision API**, streamlining the user experience by reading customers' energy bills automatically.

Projects

JUNE 2019

Portfolio Site – <https://chrisfotso.github.io>

- Built a portfolio site in order to showcase my skills and gather all project links in one place.
- Used **React** for client-side rendering, utilizing **React Hooks** multiple times for a cleaner codebase.
- Simplified CSS styling through the use of the **SASS** preprocessor and the **BEM** naming methodology.

MAY 2019

Talent Trade – <https://github.com/chingu-voyages/v8-geckos-team-05/tree/master>

- Collaborated with two team members to create the front end of an application that helps users learn new skills.
- Used the **agile workflow methodology** to streamline the development process.
- Personally developed dashboard page, homepage, and login page using **React** and **SASS**

MARCH 2019

Google Books Library – <https://chrisfotso.github.io/chingu-api-project>

- Queried the **Google Books API** based on user input, using **async/await** and the **fetch API**
- Used **CSS** to style a card for each book, specifically **flexbox** to achieve **responsive design**.
